INSTITUTIONAL ENVIRONMENTAL POLICY

Environmental conservation has taken the centre stage at the International and National level in the form of sustainable development goals. SVKM's PGCL, Mumbai is fully committed to the national objective of mitigating climate change, promoting the use of alternative energy sources, conservation of natural resources and promoting pro-environmental behaviour in all its stakeholders. Any action that conserves, protects, and rejuvenates the environment is known as green action. To align the green actions of the college to the nation and international environmental goals of preventing environmental destruction, protection and conservation of natural resources and revival of damaged ecosystems the college has a green policy. The guiding principles of the green policy are:

1. To promote greening of the campus through landscaping and housing indoor plants, reducing the use of plastic bottles and paper cups.
2. To make eco-sensitive and pro -environment behaviour towards the environment through workshops, guest lectures, seminars, and conferences.
3. Strive to emulate in students to be "Catalysts for Green Change"
4. To involve the stakeholders in environmental remedial actions such as beach clean-ups, save tree campaigns etc.
5. To reduce the carbon footprint of the college by using low energy solutions and reducing consumption.
6. To promote respect towards nature and wildlife through fieldtrips and visits to National Parks, Nature Parks, Gardens etc.
7. To conserve natural resources and switch to alternative sources of energy.
